03-A6-D9	6000	8	9	3	1500	DIESEL	350 lbs.

MADE IN THE U.S.A.

### This Compressor features:

- Air cooled, 3 stage Arctic Block
- Relief valves on all stages
- Aluminum inter coolers
- Stainless steel after cooler
- High velocity, 10 bladed fan
- Liquid filled final pressure gauge
- Combustion Engine
- Fold away lift handles
- Double rubber vibration isolation

### Options include:

- Electric starter (standard on diesel)
- Automatic drain system
- Automatic high pressure shut down

### PURIFICATION:

9,800 Cu. Ft. at 80 degrees Fahrenheit filtration system designed to provide C.G.A. grade "E" air.  
The system uses a dryer bed to remove water in excess of dew point -65 degrees. (NFPA 1500 standard)  
Activated charcoal and a carbon monoxide catalyst remove remaining contaminants to provide CGA Grade "E" breathing air.  
Additional filtration capacity can be added for high volume users

### GASOLINE OR DIESEL DRIVEN

These units are powered by combustion engines
